CANDIDATE SUMMARY:

Third-year Computer Science student with strong experience in full-stack development, systems design, and application support. Proficient in Java, Python, and JavaScript with AWS and Oracle certifications. Demonstrated ability to design, build, and test scalable applications, collaborate in team environments, and troubleshoot technical issues. Interested in Technical Systems Analyst roles with a focus on system design, performance optimization, and production support.

EDUCATION:

University of Toronto Mississauga

Honours Bachelor of Science (H.BSc.), Computer Science | September 2023 - Present

- Expected Graduation: May 2028 (Co-op Program)
- Focus on system design, application architecture, and performance optimization

TECHNICAL SKILLS:

- | | |
|--|---|
| ✓ <u>Languages</u> : Java, Python, JavaScript, TypeScript, C | ✓ <u>Web and Frameworks</u> : React, Next.js, Node.js, Express, Flask, HTML, CSS |
| ✓ <u>Concepts</u> : REST APIs, system design, performance tuning, CI/CD pipelines, debugging and troubleshooting | ✓ <u>Systems and Tools</u> : Docker, Docker Compose, nginx, Git, GitHub Actions CI/CD |
| ✓ <u>Testing and Quality</u> : Jest, jsdom, pg-mem, unit testing, API testing | ✓ <u>Cloud and DevOps</u> : AWS (Certified Cloud Practitioner), CloudFront |
| ✓ <u>Security and Analysis</u> : Trivy, Semgrep, Gitleaks, JWT authentication | ✓ <u>AI-assisted dev tools</u> : Claude, Google Gemini |
| ✓ <u>Databases</u> : PostgreSQL, SQLite | |

EXPERIENCE:

FIRST Robotics Competition (FRC) – Team 5409

Member of the Programming Sub-team | September 2022 - April 2023

- As a high school student, developed Java-based control systems for robotics components including vision systems, sensors, and actuators
- Collaborated with a team of developers to design, test, and troubleshoot real-time system behavior under competition constraints
- Participated in iterative testing and debugging to improve system performance and reliability
- Competed at the FRC World Championships, ranking within the **top 18 percent globally**

RELEVANT PROJECTS:

Radio Calico

Full-Stack Streaming Platform | April 2026 - Present

- Designed and developed a full-stack application delivering live HLS audio streaming with real-time metadata, user interactions, and historical data tracking
- Built and documented REST APIs supporting real-time data flow, user preferences, and system state management
- Implemented multi-stage Docker architecture for scalable deployment across development and production environments
- Optimized performance through lazy loading, caching strategies, and efficient asset delivery
- Developed automated test suites for backend APIs and frontend components, integrated with CI/CD pipelines
- Applied security scanning and static analysis tools to ensure code quality and system integrity
- Collaborated with AI tools to accelerate development, validate design decisions, and improve system architecture

SmartSyllabus

Academic Planning Platform | January 2026 – Present

- Collaborated in a team of six to design and build a full-stack academic planning system
- Developed and maintained RESTful APIs for authentication, scheduling, and data management
- Designed database schemas and implemented secure authentication using JWT and hashed credentials
- Integrated PDF parsing to extract structured academic data and automate scheduling workflows
- Contributed to frontend architecture using React, reusable components, and state management
- Participated in system design discussions, feature planning, and debugging across the stack

CERTIFICATIONS:

AWS Certified Cloud Practitioner | January 2026

Oracle Certified Associate, Java SE 8 Programmer | July 2025

AWARDS & ACHIEVEMENTS:

Dean's List Scholar

University of Toronto Mississauga | June 2024, June 2025

- Awarded for maintaining a CGPA of **3.5** or higher
