CANDIDATE SUMMARY

Third year Computer Science Specialist proficient in Python, Java and JavaScript and certified in AWS. Recognized for persistence in coding challenges and strong collaboration within team environments. Open to Software and Web Development Internships.

EDUCATION

Honours Bachelor's of Science (H.Bsc.), Computer Science September 2023 - Present
University of Toronto, Mississauga (expected graduation with UTM Co-op Internship Program: May 2028)
• Relevant Courses: Software Engineering, Data Structures and Analysis, Web Development, Databases

SKILLS

- **Programming Languages/Databases:** Java, Python, JavaScript, TypeScript, C, RISC, HTML, SQLite, PostgreSQL
- **Frameworks/Tools:** Claude, JavaFX, Node.js, Next.js, React, Flask, Docker, AWS, Git, GitHub Actions, MiPS

EXPERIENCE

FIRST Robotics Competition (FRC), Programming Sub-team – [Team 5409](#) September 2022 - April 2023
Garth Webb Secondary School, Oakville, ON
• Wrote sophisticated **Java** code that controls various aspects of a robot (Limelight cameras, solenoids, Roborrios, etc.)
• Worked with seven other developers and was guided by mentors with decades of experience
• Qualified for and competed against the top 18% of teams worldwide at the **World Championships** of FRC in **Houston, TX**.

PROJECTS & CERTIFICATIONS

[Radio Calico](#) April 2026 - Present
Personal Project
• Designed and built a **full-stack web app** that streams a live HLS audio broadcast with real-time now-playing metadata, album art, song history, and a per-user like/dislike rating system.
• Multi-stage Docker build separating dev, production API, and nginx images; vanilla JS frontend with HLS.js lazy-loaded on first interaction for near-instant initial page load.
• Self-hosted WOFF2 fonts, .webp image fallbacks, and timestamp cache-busting on album art fetches for page-speed optimization
• Jest test suite covering backend API routes (via pg-mem in-memory Postgres) and frontend DOM behavior (jsdom + fake timers), with GitHub Actions CI running tests and a 4-stage security scan (npm audit, Trivy, Semgrep, Gitleaks) on every push
• **Claude** was used as the primary development partner across every stage of the project, including initial architecture prototyping, Express routing, PostgreSQL schema design, nginx configuration, frontend performance optimization, the full Jest test suite, multi-stage Docker and Compose setup, GitHub Actions CI/CD, and project documentation. The project served as a deliberate experiment in AI-assisted full-stack development, with Claude driving implementation decisions at each layer of the stack.

[SmartSyllabus](#) January 2026 – Present
University of Toronto, Mississauga
• Worked with five other developers to build a **full-stack web app** for university students using *React 18*, *Flask*, and *SQLite*. Features include course grade tracking, an interactive calendar with **.ics** export, a workload notification system, and a Pomodoro focus timer.
• Used **Gemini 2.5 Flash** to parse uploaded PDF syllabi and extract assessments, weights, deadlines, and lecture schedules, which are stored in SQLite and reflected in the calendar automatically
• Built a **REST API** with 27 endpoints for authentication, course management, calendar, and dashboard features, secured with **JWT** access/refresh tokens, **SHA-256** password hashing, and **SMTP**-based password reset.
• Used *React Context* for auth state and protected client-side routing; built reusable components with a CSS custom property design system, **FullCalendar**, and **Chart.js** for grade progression graphs.

AWS Certified Cloud Practitioner

January 2026

- Certified by the multinational technology company Amazon, this certificate recognizes my knowledge of the core services, security, pricing, and basic architecture of Amazon Web Services (AWS).

Oracle Certified Associate, Java SE 8 Programmer

July 2025

- Certified by the multinational corporation Oracle, this certificate recognizes my knowledge of object-oriented concepts, the Java programming language and general knowledge of Java platforms and technologies.

AWARDS & ACCOMPLISHMENTS

Dean's List Scholar

June 2024 and 2025

University of Toronto Mississauga, Mississauga, ON

- Award recognizing exceptional academic achievement in courses (given to students with a 3.5+ cGPA)
