EDUCATION

University of Toronto

Honours Bachelor of Science in Computer Science

- Relevant Coursework: System Design, Object Oriented Programming, Web Development

Mississauga, ON

Sept. 2023 – May 2028

AWARDS & ACHIEVEMENTS

Dean's List Scholar — University of Toronto, Mississauga

- Awarded for maintaining a cGPA of **3.5** or higher

June 2024, June 2025

CERTIFICATIONS

AWS Certified Cloud Practitioner

January 2026

Oracle Certified Associate, Java SE 8 Programmer

July 2025

EXPERIENCE

Co-Founder/Software Developer

January 2026 – Present

SmartSyllabus, University of Toronto

Mississauga, ON

- Co-founded and developed **SmartSyllabus**, an *early-stage* academic planning **startup**, collaborating with five developers to build an **AI-powered full-stack web app** that converts course syllabi into structured schedules, deadlines, and workload insights using **automated PDF parsing**, a *Flask* backend with 30+ endpoints, a *React* frontend, and a *SQLite* database
- Used **GitHub Projects** in an agile workflow to track task ownership, surface blockers, and coordinate across teammates, ensuring issues were resolved quickly and work was distributed effectively across the team
- Selected for **Ideation Lab**, a competitive experiential learning program hosted by **ICUBE UTM**, the hub for social entrepreneurship and *early-stage startups* in the University of Toronto, Mississauga

Embedded Programmer

September 2022 – April 2023

FIRST Robotics Competition Team 5409, Garth Webb Secondary School

Oakville, ON

- Collaborated with seven developers in an iterative team environment to design, develop, test, and refine **Java**-based robot control software using **WPILib**'s command-based framework, organizing functionality into modular subsystems and commands across 50+ source files
- Integrated Limelight vision tracking, targeting logic, and real-time debugging workflows to support field localization, distance calculation, automated alignment, while making time-sensitive fixes during live testing
- Competed at the FIRST Robotics Competition **World Championships**, ranking within the **top 18% of teams globally**

PROJECTS

Radio Calico | *JavaScript, HLS.js, Node.js/Express, Jest, PostgreSQL, Docker, nginx, Claude* April 2026 – Present

- Built a **full-stack web radio player** featuring live *HLS* audio streaming, real-time metadata, and user interaction, using Node.js, Express, PostgreSQL, and vanilla JS across a clean client-server separation
- Containerized the app with a **multi-stage Docker setup** (nginx, Express, Postgres) for dev and prod parity, configured a **GitHub Actions** CI/CD pipeline with **automated Jest testing** and multi-layer security scanning
- Leveraged **Claude** as an AI development tool throughout the full software lifecycle, from architecture planning and API design to schema modeling, testing, deployment, and troubleshooting, and improving code quality

TECHNICAL SKILLS

Developer Tools: Git, GitHub, PyCharm VS Code, IntelliJ IDEA

Languages: Java, Python, JavaScript, TypeScript, C, RiSC Assembly

Testing and Quality: Jest, jsdom, pg-mem, unit testing, integration testing, API testing

Security and Code Quality: Trivy, Semgrep, Gitleaks, vulnerability scanning, static analysis

Cloud, DevOps, and CI/CD: AWS, Docker, Docker Compose, GitHub Actions CI/CD, Makefile, Vite

Frameworks and Runtime Environments: : React, Next.js, Node.js, Express, Flask, JavaFX, React Router

AI-Assisted Development: Claude, Google Gemini, architecture prototyping, testing support, data extraction

Databases and Backend Technologies: : PostgreSQL, SQLite, Prisma, REST APIs, JWT Auth, SMTP, nginx
